# West Florida Electric Cooperative FACT SHEET

West Florida Electric

A Touchstone Energy® Cooperative 

*The power of human connections*

**West Florida Electric Cooperative (W FEC) is a non-profit Touchstone Energy® Cooperative owned by its members and locally operated. W FEC serves approximately 28,000 meters, providing dependable electricity & other services at competitive prices in Calhoun, Holmes, Jackson & Washington Counties in Northwest Florida.**

We're powering savings by offering incentives to upgrade electric furnaces to high-efficiency heat pumps in new or existing manufactured homes. About 32% of W FEC's members are manufactured homeowners. Here in Florida, more than 10 percent of homeowners buy manufactured homes. These residences serve a real need for affordable housing, but there is also a need for these homes to be more energy-efficient. Since they typically come with an electric furnace, we're launching a program to help manufactured home buyers, as well as existing owners, upgrade to a high-efficiency heat pump. This will lower electric use during cold months & save participants an average of \$550 per year on heating costs! For all of us who are already watching every penny, \$550 per year over many years really adds up.

# HOW IT WORKS:

## Existing Manufactured Home

- A WFEC representative will do an inspection after the unit is installed at the home
- Rebates & dealer incentives should be received within 2 weeks of the inspection

### Existing Manufactured Homes:

- \$400 per ton to the member for converting from an electric furnace to a heat pump  
+ \$100 HVAC Dealer Incentive

### Requirements:

- Must replace an existing standard electric unit
- Must have a load calculation to determine proper size
- Must have model & serial number of heat pump

For additional information about this program, contact **Rhonda Byrd-Lee** by emailing [rbyrdlee@westflorida.coop](mailto:rbyrdlee@westflorida.coop) or calling (800) 342-7400.
